Stor-Dry

230v Dehumidifier

SEEKR by Caframo

The Stor-Dry's internal warm air blower continuously draws in cool, damp air and expels it as warm, dry air, keeping cabins and lockers free from damp and mould.

Unlike traditional dehumidifiers, the Stor-Dry's unique reservoir-free design means that there is never any need to empty or provide a drain hose.

Extremely effective in areas up to 1000ft^3 (28m^3), the Stor-Dry is the must-have product for the winterization season.

2-YEAR WARRANTY
